ELMECA End Mill Holders with H - 30 Taper (MITR) R8

MITR Accessories (H 30 Taper)

These accessories are suitable for use on milling machines model MITR made by HMT. Collets to suit the above accessories are readily available ex-stock.

These accessories are being used as original equipment by HMT for their MITR Milling Machines.

Arbors are manufactured from high quality case-hardened alloy steel.

Arbors are manufactured as per I.S. No. 2169-1963 with a slight modification - instead of providing a separate driving collar, screwed dogs are provided.

Arbors for SANDVIK face milling cutters are also manufactured on special requests and provided that the quantity ordered is not small.

Elmecca Endmill Holders :-

These end mill holders are also used for straight shank cutters like Collets. But the use of these is preferred when close tolerances are to be achieved. Unlike Collets, the clamping is effected by a grub screw on the flat of the cutter shank. Due to this feature the out-running of the cutter is reduced to the minimum and heavier cuts are possible. Design of these holders also facilitates the use of cutters upto 25 mm/1" in diameter. Standard sizes available are 4, 5, 6, 8, 10, 12, 16, 20 & 25mm/3/16, 3/8 1/2, 5/8, 3/4, 7/8 & 1". Other accessories which are available for use on MITR milling machine are adaptors with standard E-40 or 'M' Series Collets. Boring heads Elmecca 160 & 260, Milling fixture-indexing and non-indexing types. The details of the same are available in the catalogue elsewhere.
